

Adult Night at The Foundry!

November 3, 2017

6:30 p.m. - 8:30 p.m.

Makerspaces are unique community spaces that provide a wide variety of tools and machines so folks can do everything from 3-D printing, laser etching, sewing, carpentry, electronics and so much more!

Here's a chance for us adults to do some hands on learning while enjoying an adult only time and a cold, adult beverage. Activities include:

- Take a walk through Van Gogh's painting "Night Café" using virtual reality technology.
- Learn simple vector programming to create a etched acrylic piece. (Vector programming is also used in 3-D printing and other electronic tools.)
- Play with Little Bitz -- learn how you can use these to your troop meetings for some hands-on STEAM.
- Watch the item you programmed become a 3-D reality!

Hmmm..... Date Night????

Bellingham's 1st Friday Art Walk is that evening, too....

Check out the great restaurants and micro-breweries in Bellingham....

Location: The Foundry Makerspace
